# Manually Add and Configure a Single Digital Signature

These instructions will guide you to creating and customizing a digital signature button from scratch.
From Designer 2.3:
1. Add a function button to your IMT.

2. Double-click the button to open its **Properties** dialog box.

3. In the **Text** field, type in *Click here to sign*.

4. Under **Perform This Action**, click the dropdown arrow and select **Signature**.

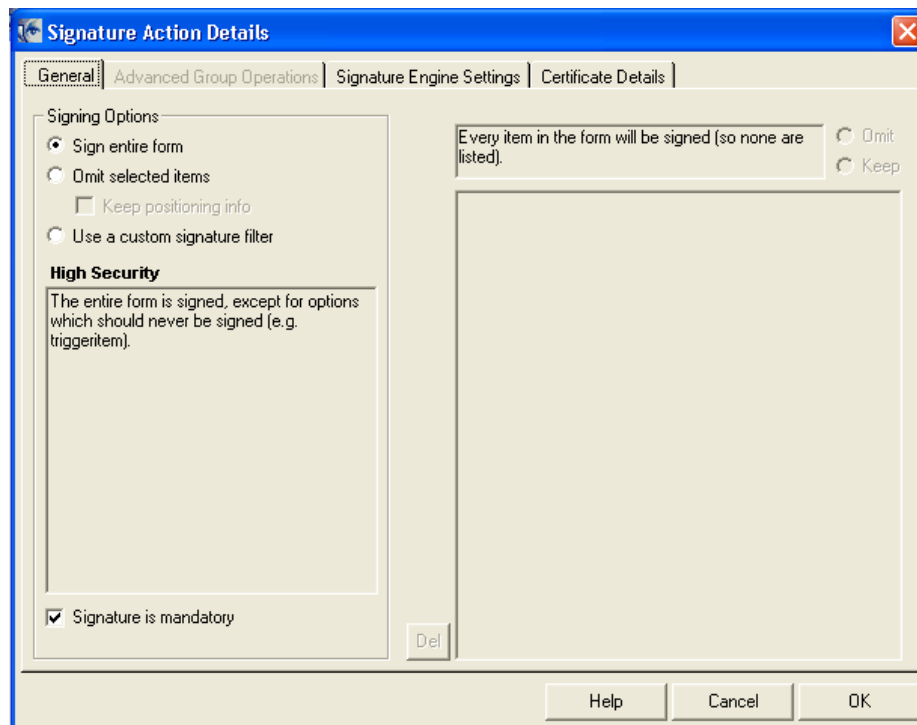

5. Click the **Details** button.

6. Click on **Signature Engine Settings** tab. Make sure it looks like the image below.

7. Click the **General** tab. Make sure your screen looks like the image below.

8. Click **OK** twice to get out of *Signature Action Details* and *Properties* dialog box.
